

View RLDB Test Results and Feedback When Test Availability Date Has Past

These instructions explain how to view test results and feedback for those tests where Respondus LockDown Browser (RLDB) and/or Respondus Monitor was required.

1. On a computer that has Respondus LockDown Browser (RLDB) installed, start the RLDB program.
2. Login to Blackboard using your email username and password.
3. Get into the course.
4. Go to My Grades (this can be found in the Tools area if the professor does not have a link to it on the course menu).
5. Click on the link for the exam you want to see the results/feedback for.
6. On the next page showing the exam attempts, click on the calculated grade (click on the score). This should open a webpage showing the results and feedback.
7. **Exit RLDB when finished reviewing the test results.**

IMPORTANT: Do not try to do other coursework or navigate to other courses using RLDB. Only use RLDB for taking exams where RLDB/Respondus Monitor is required OR for reviewing the results of exams where RLDB/Respondus Monitor was required.
